definitive enrolment

Individual support

Since 2010, the École Privée Moléson has been focusing on the personal and participative support of children so that he or she evolves in a harmonious environment.

Everything the child needs is close at hand, ensuring a peaceful environment where they can concentrate on their schooling.

Global development

The school puts in place organisational structures and educational interventions that promote the overall personal, social, motor and cognitive development of each child.

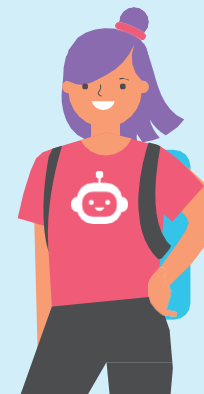

The small multi-grade classes enable children to develop in an environment where we care about their progress and well-being.

A qualified and competent team

The qualified teachers, ensure a high standard of the pedagogical and educational environment to accompany each child in a personalized and participatory way. The development of the student's potential is at the heart of their daily concern, always in compliance with the directives of the Directorate of Public Instruction.

New technologies

We aim for our pupils to master digital tools, conduct appropriate research and present their work effectively.

Educational project

The importance of early learning, socialisation, knowledge building and the acquisition of cognitive tools are important stages in a child's development.

The École Privée Moléson has organizational structures and implements educational interventions that promote the overall development of each child at the personal, social and cognitive levels.

The school provides a **warm and welcoming environment** where children learn while benefiting from personalised support.

Intellectual development, flexibility in thinking and listening skills are all qualities that pupils learn at our school.

We create a pedagogical and educational environment that allows children to develop critical and open thinking as well as a creative spirit. Teachers accompany and supervise each student in a participatory manner. All members of the team ensure that each student can learn and flourish in a healthy, reassuring and respectful atmosphere.

Multilingual teaching

German and English from the 1H

The École Privée Moléson offers multilingual teaching based on the Content and Language Integrated Learning (CLIL) model. While our French-speaking school follows the Programme d'Études Romand (PER), part of the curriculum is taught in English and German from 1H.

This enables pupils to broaden their view of the world and acquire the skills to interact in a diverse environment.

An asset for schooling

The teachers of the school have followed a specific training, called CLIL (Content and Language integrated Learning) which allows an innovative and beneficial approach for the students.

While following the general curriculum of a subject (eg History, Biology, Science...) a foreign language (English / German) is used as a means of teaching.

The foreign language changes from the status of communication to a language of knowledge.

Pupils can express themselves and communicate in all three languages (French, English and German) and are enriched by the culture and experiences of others.

Entry into the middle school

Register your child

Entry into the Orientation Cycle (OC or middle school) is an important step in your child's schooling. After eight years of primary school, your child joins the OC for the next three years.

After having acquired the basic knowledge in different subjects in primary classes, entering the OC induces a more complex approach and it's important that your child shows autonomy, maturity and confidence in his learning. Our mission is to accompany your child for a successful entry into the OC.

...for a successful entry into the middle school

- Develop the work in autonomy and the organization of the student
- Encourage him in his efforts with kindness
- Support him in the progression of his learning
- Ensure the achievement of its objectives
- Value and nurture its strengths
- (Re)find the desire to study and take on challenges
- Differentiate learning in case of difficulties

Founded in 1836, the
École Libre Publique
was privatised in 2006
and became the École
Privée Moléson in 2018

Extracurricular activities

One of the strengths of the school is its wide range of hours. From 7.30 am, the premises are open and the reception is provided until the start of classes. At lunchtime, children can eat in the cafeteria and, at the end of the day, a care is offered

Out-of-school reception

From 7.30 am to 6.00 pm on school premises.

Cafeteria

The meals are healthy, tasty and the food is specially adapted for children.

Out-of-school swimming

Children can improve their swimming skills in the context of extra-curricular classes.

Out-of-school sport

The school offers a multi-sport session that allows children to experience a variety of movements and burn off energy.

Supervised homework

The pupil learns to work independently, gains autonomy and builds confidence.
